

All,

Please be advised that pursuant to the guidance of the Sublette County Health Officer, all County facilities will be closing to the general public at 5:00 on March 19, 2020. There will be a statement from Commissioner Burnett later today to all County supervisors addressing the closure. The intent is that County operations continue uninterrupted as best as possible after the closure, and that each department conducts as much business it can by phone, email, regular mail, fax, etc. I know that each County department has different needs and missions, so please take whatever steps are necessary to continue the work of your department. Feel free to contact me should you have any questions. Thanks for your patience and dedication, and please know that the County is doing everything it can to protect the public and its employees during these uncertain times.

Matt Gaffney  
Sublette County Administrator
